-

PROFESSIONAL EXPERIENCE

Dictionary.com — Oakland, CA (remote)

Staff Software Engineer

April 2023 - present

- Lead engineer for redesign of Dictionary.com and Thesaurus.com websites, serving 40 million daily users
- Developed in-house design system in tandem with design team using Figma, Ariakit, and Style Dictionary
- Converted 5+ RESTful API calls into a single Apollo GraphQL query that retrieved only the necessary data for populating Dictionary and Thesaurus browse pages
- Implemented Storyblok's Headless CMS to populate shared data modules, enhancing content creation and scheduling efficiency for the content team
- Formulated a design patterns document to establish best coding practices across engineering teams

Dictionary.com — Oakland, CA (remote)

Senior Software Engineer

August 2021 - April 2023

- Optimized UX of Grammar Coach editor by integrating WebSockets and implementing sentence diffing, which reduced the average payload size by 90 percent and decreased API latency by 75 percent
- Refactored Grammar Coach's Next.js codebase (100+ components) to TypeScript, introduced Redux Toolkit, and significantly expanded end-to-end testing coverage with Cypress
- Collaborated with product, design, backend, and machine learning teams in an agile environment

Great Lakes Consulting Services, Inc. — Livonia, MI

Software Developer

January 2019 - July 2021

- Developed and managed a React with Redux and TypeScript frontend of an end-to-end budget forecasting application with millions of hospital records for Trinity Health's budget team
- Designed a multi-page dashboard application with interactive charts and graphs with Dash/Flask (Python)
- Contributed to the recruitment and mentoring of junior engineers and interns, facilitating their seamless onboarding and training processes

Logicdrop — Ferndale, MI

Software Developer

April 2016 - December 2018

- Launched multiple websites and web applications for a multitude of clients using cutting-edge frontend frameworks such as Angular 2+, React and Vue
 - Led frontend development for Logicdrop's Studio Platform, a tool for enterprise-level document automation with a drag-and-drop template editor comprised of over 20 custom elements
 - Utilized RxJS observables to provide real-time progress updates to users uploading large documents
 - Implemented robust functionality for importing Excel spreadsheets and .CSV files into editable data tables
-

EDUCATION

Oakland University — Rochester, MI

December 2010

- Bachelor of Arts in Journalism (Cum Laude with departmental honors)
-

CERTIFICATIONS

Amazon Web Services

February 2024

- AWS Certified Cloud Practitioner (CLF-Co2)

Grand Circus — Detroit, MI

March 2016

- JavaScript Developer Certification
